

# 1 markdown-tex

markdown processor in TeX.

## 1.1 supported syntax

So far, you can write normal paragraph, codelist, quootatio, itemize list, and enumerate list.  
As inline styles, `tt`, *italic*, and **bold** are available.

## 1.2 example

Inshort, you can write something like below. Below is a `codeline` block.

`codeline`

`another codenline`

Here is a enumerate list.

1. enumerate
2. in
3. the markdown way

## 1.3 subsection

itemize list.

- this block
- will
- turn
- into an
- itemize

And a quotation.

Quote Somethin Really **Awesome!**

Here is the end of markdown text.
